## Summary

ML Engineer specialized in LLMs and deep learning. Experienced building end-to-end ML pipelines, optimizing training/inference on distributed, multi-GPU systems. Strong in LLM training, evaluation and deployment, RL environments development and MLOps best practices.

## Professional Experience

<b>Machine Learning Engineer</b> <b>Nebul – Leiden, Netherlands</b>	Apr 2025 – Present
<ul style="list-style-type: none"><li>Built <b>LLMOps/GitOps</b> workflows with <b>Helm</b> for one-click, reproducible deployments and benchmarking on Kubernetes.</li><li>Co-developed a production <b>LLM inference API</b> on a 120-GPU <b>Kubernetes</b> cluster using <b>SGLang</b> and <b>vLLM</b>, managed via <a href="#">Open Model Engine CRs</a></li><li>Operationalized NVIDIA's cloud-native stack: <b>GPU Operator</b> (drivers, device plugin, Container Toolkit, DCGM) and <b>Network Operator</b> (RDMA/GPUDirect, CNI) for high-throughput, low-latency serving.</li></ul>	
<b>ML Research Engineer Intern</b> <b>Siemens Digital Industries Software, Leuven, Belgium</b>	Oct 2024 – Mar 2025
<ul style="list-style-type: none"><li>Developed transformer-based neural networks for fast numerical PDE solvers on unstructured meshes and time-dependent simulations.</li><li>Implemented <b>PyTorch DDP</b> (Distributed Data Parallel) for multi-GPU training.</li></ul>	
<b>Individual Contributor – Project Numina</b> <i>Remote</i>	Aug 2024 – Jan 2025
<ul style="list-style-type: none"><li>Built an automated LLM evaluation pipeline for high-school math problems using the <b>OpenAI Batch API</b> for verification and <b>vLLM</b> for rollouts generation.</li><li>Designed a synthetic data generation pipeline for math problem dataset creation with open-source LLMs.</li><li>Developed a bootstrapping pipeline to auto-formalize natural language into <b>Lean 4</b> statements, and fine-tuning on them with <b>LLaMA-Factory</b>.</li></ul>	

## OSS Contributions

<b>Prime Intellect – Environments Hub</b>	Sep 2025
<ul style="list-style-type: none"><li>Ported <a href="#">AidanBench</a>, a creativity &amp; long-context RL/evaluation benchmark, to the verified <a href="#">Prime Intellect Environments Hub</a>. <a href="#">Link</a></li></ul>	

## Papers

<b>Kimina-Prover Preview: Towards Large Formal Reasoning Models with Reinforcement Learning</b> Related to <a href="#">Project Numina</a> arXiv: <a href="#">2504.11354</a>	Apr 2025
---	----------

## Education

<b>MSc in High-Performance Computing Engineering</b> <i>Politecnico di Milano, Italy</i> Grade: 110/110, <i>cum laude</i> <i>Recipient of merit-based scholarship for outstanding academic performance</i>	Mar 2023 – Mar 2025
<b>BSc in Mathematical Engineering</b> <i>Politecnico di Milano, Italy</i> Final Grade: 103/110	Sep 2019 – Sep 2022

## Technical Skills

<b>Programming:</b> Python, Go & C/C++ (familiarity)	<b>ML Libraries:</b> PyTorch, vLLM, SGLang
<b>Infrastructure:</b> Docker, Kubernetes, Helm, GitOps, Argo CD	<b>LLM Stack:</b> LangChain, Langfuse, LiteLLM, Verifiers
